Good afternoon Phil

I just wanted to send you a note to let you know that EPA is reviewing the data submitted by Falcon for the original RI. We are looking at it to determine if there is a real need to take all of the samples called for in the FSP. Also when I went to the site in February, I noted that there was what appeared to be sandblasting medium on the road and in the wetlands (AOC3). Are there environmental inspections of the facilities adjacent to the site and if not could we discuss how data from adjacent facilities can be collected?

Thanks

Brian W Mueller RPM
